DHET THROUGHPUT STUDIES

12/08/2015 HEMIS Institute 2

THROUGHPUT: DHET METHODOLOGY

- Records are extracted from the HEMIS database for the base year data and filtered to only render the first-time entering undergraduate students. This includes students enrolled for three and four year undergraduate programmes. Only South African citizens are tracked, all the records containing non-valid South African National Identity numbers are removed from the dataset. The South African Identity number is used to track the progress of students.
- The data for the base year consist of data fields for race, gender, field of study, graduation status, qualification type and the South African Identity number. Subsequent years do not need all these fields and only includes graduation status, qualification type and South African Identity number. It is assumed that the other fields remain the same throughout the study.

12/08/2015

HEMIS Institute

3

THROUGHPUT: DHET METHODOLOGY

- The second level of data cleaning is eliminating duplicate South African Identity numbers. The records are evaluated according to the following logic;
- The graduation status reflects a finish within the logical period of three years or four years depending upon the qualification type, not earlier. An earlier finish indicates a non-first-time entering student that was wrongfully enrolled as a first-time entering student and the record is removed from the tracking process.
- Where there are multiple fields of study, one is selected by choice should both records seem legitimate.

12/08/2015

HEMIS Institute

4

THROUGHPUT: DHET METHODOLOGY

- The third level of data cleaning looks at the multiple graduation status. Records are cleaned by removing the graduations after the first graduation status. This is to eliminate multiple graduation counts and false dropout counts.
- The dataset is now ready for the calculations to be done. The calculations are done for all qualification types combined (three and four year qualifications) first and then it is done for the three and four year qualifications separately.
- Dropouts are calculated by counting all the blank fields from one year in the table. Blank fields represent no student record and are regarded as a dropout. The total number of graduates in prior years have to be subtracted from this total to get the final dropout number. The difference between the sum of dropouts + graduates will be students who are still studying.

HEMIS Institute

5

THROUGHPUT: DHET METHODOLOGY

- If a student drops out from one university and enters another institution then the student is not treated as a dropout. A student who changes courses is not treated as a dropout and a student who dropouts and returns at a later stage is accounted for in the study, and is not counted as a dropout.
- During 2003 to 2005 the public higher education landscape underwent a transformation with the merger of a number of institutions taking place. During this process the number of public higher education institutions decreased to 23. At this time there were instances where course codes and entrance categories were changed and South African Identity numbers were not useable. In this study these records were taken out of the equation.

NATIONAL DROPOUT AND THROUGHPUT RATES FOR SPECIFIC QUALIFICATIONS AND FIELDS OF STUDY

Dropout and throughput rates for the MBChB qualification, for the Bachelor of Education qualification, 3 and 4 year engineering qualifications, 3 and 4 year Life and Physical Science qualifications, qualifications in the field of Business studies, the field of education, qualifications in humanities fields other than education and dropout and throughput rate for the major fields of study in science engineering and technology were also undertaken for this publication.

12/08/2015

HEMIS Institute

16

NATIONAL DROPOUT AND THROUGHPUT RATES FOR SPECIFIC QUALIFICATIONS AND FIELDS OF STUDY

In order to do these type of cohort studies the DHET has to extract data by qualification name and create a new table in the database. It must therefore be realised that if a qualification name is incorrectly reported then those students are excluded.

The dropout and throughput rates for students with disabilities and for NSFAS students will be included in the next publication and the data for this study is being obtained from NSFAS.
