Overall Evaluation

Please give feedback on how we can improve the IR Institute

- It would be great to invite **more universities to present** and share their experiences and information.
- Perfect
- Provide the population of the attendees to the presenters so that they can prepare for **different views**
- The conference was great
- There's a need to reach directly to comprehensive institutions especially the rural based on lower ranking systems.

Specific Outcomes

- Need for a Special Interest Group on University Rankings
